Att: Mr. Miro Zecevic

Dear sir,

After several discussions and meetings, I decided to work with you and group in order to take my company, Collagenna Skin Care Products Inc, public.

We were acquired by Global General Technologies in July 2009 and I must admit that the process has been quite revealing. We have had to overcome several hurdles to finally get out of the gate and we have had to change our game plan several times.

I have been impressed by the knowledge and effort that you and your team have invested in GLGT and there has always been a plan in place to overcome any issues which may linger.

I am very optimistic about the immediate future for GLGT and I know that I can always count on your expertise and knowledge to maximize the results.

Going public is a complicated affair and a company like ours needs the knowledge of Mina Mar in order to succeed. Everybody's situation is different but I would definitely recommend using Mina Mar's services in order to go public.

Sincerely

Michael Arnkvarn
President CEO
